Judgment of the Public!

During the past five years the public have carefully observed the wonderful cures accomplished from the use of VEGETINE. From its use many an afflicted sufferer has been restored to perfect health, after having expended a small fortune in procuring medical advice and obtaining poisonous mineral medicines.

Its medical properties are Alterative, Tonic, Solvent and Distriction. There is no discusse of the human system for which the VEGETINE cannot be used with perfect safety, as it does not contain any metallic or poisonous compound. It is composed exclusively of barks, roots and herbs; it is very pieasant to take, every child likes it. It is safe and reliable, as the following evidence will show:

Valuable Evidence. The following unsolicited testimonial from Rev. O. T. Walker, D. D., formerly paster of Bowdoin Square Church, Boston, and at present settled in Providence, R. L., must be deemed as reliable evidence. No one should fall to observe that this testimonial is the result of two years' experience with the use of VEGETINE in the Rev. Mr. Walker's family, who new pronounces it invaluable:

A Walking Miracle. MR. H. R. STEVENS:

Dear Sir—Though a stranger, I want to in form you what Venerine has done for me.

Last Christmas Scrofula made its appearance. ALFRED GRABER......Cashier Last Christmas Scrofula made its appearance in my system—large running ulcers appearance on me, as follows: One on each of my arm one on my thigh, which extended to the sent one on my head, which extended to the sent one on my left leg, which became so had that two physicians came to amputate the limb though upon consultation concluded not to de so, as my whole body was so full of Scrofula; they deemed it advisable to cut the sore, which was painful beyond description, and there was a quart of matter run from this one sore.

The physicians all gave me up to die, and said they could do no more for me. Both of my legs were drawn up to my sent, and it was thought if I did get up again I would be a cripple for life. for life.

Then in this condition I saw VEGETINE

advertised, and commenced taking it in March, and followed on with it until I had used sixteen bottles, and this morning I am going to plough corn, a well man. All my townsmen say it is a miracle to see me round walking and working.
In conclusion I will add, when I was enduring such great suffering, from that dreadful
disease, Scrofula, I prayed to the Lord above to
take me out of this world, but as Veogriisk has
restored to me the blessings of health, I desire
more than ever to live, that I may be of some
service to my fellow-men, and I know of no
better way to aid suffering humanity, than to
inclose you this statement of my case, with an
earnest hope that you will publish it, and it
will afford me pleasure to reply to any communication which I may receive therefrom.

THE INFLUENCE OF THE VOICE IN SCHOOL MANAGEMENT.

Next in order of influence is the eacher's voice. For mere purposes of use as the eve. It must be more con monly appropriated to the work of geniscipline, the voice should convey the same lesson to all the scholars. In this way the teacher's voice should be a But words to be wisely used in this way must be sparingly used. There is not greater mistake in this relation than to uppose that abundance of speaking is the measure of its power. Needless speaking is an offence against good govrnment, as in the scholar it would be a reach of discipline. In every case it hould be generally felt that there was eal occasion for speaking. Besides it oust be remembered that even apppropriate counsel may be overdone by fre uency of repetition. Warnings lose their force if they are constantly reiterated, and this unfortunate result is more rapid if they are invariably shouted at the top of the voice. As has been well said, "Nothing more impairs authori ty than a too frequent or indiscreet use of it. If thunder itself were to be continual, it would excite no more terror than the noise of a mill." Incessant fault finding involves a rapid evaporation

of moral influence. None of us likes to be continually lectured, and children as naturally and reasonably dislike it as their seniors. A very little observation will suffice to convince any teacher that similar warnings closely repeated become a positive disturbance to the whole school.

It is a good plan for the teacher have a number of sentences or paragraphs at hand with which to illustrate omething under special consideration in the reading recitation. And, by the Lawson's Curative way, there should be a special aim, a particular something to be accomplished Once more in a Southern prison i in each recitation. These sentences shoud be written upon the board before hand and the pupils called upon to read With hundreds around me starvin
